

# TAURUS®

## executive solutions

### Help.

The 'Taurus' logo and business card set were created as a freebie on 20th July 2011 by <http://www.robbydesigns.com> Twitter: <http://twitter.com/robbydesigns>

### Fonts

The fonts used in this design are 'Century Gothic' and 'Century Gothic Bold' which are both available free of charge from [www.webpagepublicity.com/free-fonts-c.html](http://www.webpagepublicity.com/free-fonts-c.html)  
Be sure to install fonts before you begin the edit job!

### Editing

**Text:** You should first install the fonts listed above and then edit the text in the normal manner using Photoshop. The 'Registered' symbol was created using a default Photoshop brush.

**Image:** The Shield and the Bull are separate layers that were not designed to be edited in themselves but can be easily replaced if you so wish.

### Printing

This template includes bleed and is CMYK print ready. Be sure to check the dimensions of the design with the print shop you use before you pay for any print job, note that any changes you make to this template may effect the margin allowed for bleed so edit carefully and enjoy the design!
